This seems general and straight forward. Do you have any concerns?

Subject: Pelosi Letter Response

Angeles,

Below are excerpts from our draft response to the letter we received from Rep Pelosi. We wanted to ensure you know how we are responding to her request to scan Parcel A and what information we are providing on the status of the Parcel G Work Plan. We are sending our complete draft letter to the Office of the SECNAV for review and comment tomorrow. There are a lot of folks in the chop chain so there is always the potential for change but we wanted to let you know how we are intending to respond to these two key issues. Please let me know if you would like to discuss, thanks.

v/r,
Kim

In response to the concerns of the Hunters Point residents and the City of San Francisco, the California Department of Public Health (CDPH) is evaluating requests to perform radiological scans of Parcel A and validate its safety. CDPH is coordinating efforts with the Department of the Navy (DON), EPA and the California Department of Toxic Substances Control. If scanning is approved, CDPH expects to finalize a work plan within 60 days and then scanning is anticipated to occur in late summer.

Since Parcel G is the City of San Francisco's top priority, the DON plans to complete a draft work plan for the retesting of Parcel G by mid-June 2018. The regulatory and public review period is expected to last at least 60 days, after which DON will make any required revisions and finalize the work plan. We anticipate the testing of Parcel G to commence in the fall of this year.
